**New Altacam Vision™ Website - Highlights UAV Camera Turret Expertise**

A new website is available from Altacam Vision™ Corporation. This Hood River, Oregon headquartered firm engineers and manufactures a range of stabilized daylight and infrared imager turrets with demonstrated success in providing high quality observations. The website is available at:

[www.alticamvision.com](http://www.alticamvision.com)

“Our new Altacam Vision™ corporate website provides basic information about our stabilized camera turrets. This includes data sheets on our proven daylight and infrared imagers that can be configured for a variety of missions. The new website also contains information about smaller and lighter turrets that are available for users who are looking for an economical approach to surveillance with more compact aircraft,” Dr. Lars Bergstrom announced.

“We continue to find interest in Altacam Vision™ systems steadily increasing. This includes a growing awareness that university programs have about how they can utilize our expertise. Additionally, you can hardly read the news without information about advanced imaging systems aboard unmanned aircraft – often referred to as ‘drones’. Many of these imaging systems are Altacam Vision™ products. These systems are used daily to make detailed observations while keeping personnel out of harm’s way.”

“Altacam Vision™ supplies commercial, military, educational, research, engineering, aerospace and environmental programs with stabilized turret systems. Our new website helps deliver the information needed by these groups and to make them better aware of our expertise,” Dr. Bergstrom said.
